

MEDPRICE.COM

BENEFITS OF 'CASH PRICING'

You may save money by using **MEDPRICE.COM** when paying out-of-pocket for your healthcare services. Healthcare providers who enroll in the **MEDPRICE.COM** program and become Associates are asked to offer their services at a price break for patients/users that are paying in full by **cash, check** or **charge** at the time of service. When checking in at your appointment, payment will be required prior to receiving service.

Every **MEDPRICE.COM** Associate will have a price sheet that lists an 'Office Visit' or 'Service Appointment' cash price, as well as any 'Additional Services' that the healthcare provider chooses to offer with a price break. Patients will not have access to this price sheet but may inquire about prices with the healthcare provider or their staff at the time of their appointment.

If a healthcare provider is not listed as an Associate and there is no indication of a 'Cash Price' offering, then it must be assumed that a full retail price will be charged unless otherwise discussed between patient and healthcare provider prior to or at the designated appointment.
